

KING WAI LAI YU

UX/UI Designer · Frontend Developer · Hardware & Support Technician

Heredia, Costa Rica • kwlai121@gmail.com • (+506) 7049-4874 • Portfolio: <https://kwlai121.github.io/creative-project-display/>

PROFESSIONAL PROFILE

UX/UI Designer and Frontend Developer with 10+ years of experience specialized in taking digital products from research and prototyping in Figma through to implementation in code (React, HTML5/CSS3, JavaScript). Experienced in designing and developing websites and web applications with a strong focus on usability, visual consistency, and user experience throughout the entire product lifecycle.

Proven track record optimizing production interfaces within agile teams (Jira/Scrum) across diverse industries, including complex platforms like sportsbooks. Currently develops independent redesign case studies focused on simplifying critical user flows, improving accessibility, and building scalable design systems with tokens. Combines visual sensibility, systems thinking, and production-ready code to seamlessly bridge the gap between design and development.

KEY SKILLS

- Frontend Development: HTML5, CSS3, Bootstrap 5, Tailwind 4, JavaScript (ES6+), React (fundamentals), Git, responsive design
- UX/UI Design: Figma, wireframing, prototyping, design systems (tokens), accessibility, mobile-first, user research, AI assistance
- Artificial Intelligence: uses Claude (Anthropic) as an assistant for design, prototyping, code generation and optimization, and accelerating UX/UI and frontend workflows
- Website and application design focused on UX/UI, prioritizing usability, information architecture, and user experience
- Graphic Design: Adobe Photoshop, Adobe Illustrator, logo design, banners, and marketing materials
- Platforms / CMS: WordPress, Elementor, HTML email design for marketing, SQL (basic)
- Agile Methodologies: Kanban, Scrum, sprint planning, backlog management, Jira

PROFESSIONAL EXPERIENCE

Graphic Designer & Frontend Developer | *Web Design Solutions (WDS)*

2016 – 2026

- Designs logos, advertising banners, and marketing materials for sports betting sites and general websites, including sports wagering banners for multiple client landing pages.
- Designs and implements landing pages and site style modifications, maintaining and optimizing the performance and load speed of production WordPress sites.
- Currently contributing to the refactoring of a production sportsbook platform engine, focused on improving performance and code maintainability alongside the development team.

Freelance Frontend Developer | *Independent Projects*

2011 – Present

- Currently contributing to the development of SWAP, a web application, building a reusable component architecture in React, Bootstrap 5, and Styled Components in direct coordination with the backend team.
- Developed the responsive landing page for Caricaco Academy (academia.caricaco.org) with an educational, mobile-first approach.
- Developed the responsive website for Proconsulta (proconsultaconstruccion.com) with a mobile-first approach.

Webmaster | *KMStudio*

2010 – 2011

- Designed and developed WordPress sites and HTML email templates for marketing campaigns.

Hardware & Support Technician | *Compufactory S.A., Tech Electrónica S.A. and Taller Lai S.A.*

2006 – Present

- Hardware diagnostics, repair, and technical support; preparation of technical proposals for clients.
